NAVY DEPARTMENT, Bureau of Provisions and Clo June 26, 1861.

SEPARATE PROPOSALS, sealed and endorsed "Proposals for Nay Supplies," will be re-ceived at this Bureau until 2 o'clock A. M. on Wednesday, the 24th day of July next, for far-nishing and delivering (on receiving ten days notice, except for biscuit, for which five days' notice shall be given for every twenty thousand notice shall be given for every twenty thousand pounds required; at the United States Navy Yard, Philadelphia, Pennsylvania, such quantities only of the following articles as may be required or ordered from the contractors by the chief of this bureau, or by the commanding officer of the said Navy Yard, during the fiscal year and the June 30 1882 viz. ending June 30, 1862, viz:

Biscuit, flour, rice, dried apples, pickles,

gar, tea, beans, molasses, vineger, and whisky. The biscuit shall be made wholly from sweet superfine flour, of the manufacture of the year 1860 or 1861, but shall in all cases be manufac-tured from flour made of the crop immediately preceding the dates of the requisitions for the same; and shall be fully equal in quality, and conform in size and shape, to the samples which are deposited in the said Navy Yard; shall be properly baked, thoroughly kiln-dried, well packed, and delivered free of charge to the United States, in good, sound, well-dried, bright flour barrels, with the heads well secured.

The flour shall be equal to the best Richmond and Baltimore brands, and of the manufacture of wheat grown in the year 1860 or 1861; but shall in all cases be manufactured from pure, sound, treah-ground wheat, of the crop immediately tresh-ground wheat, of the crop preceding the dates of the requisition for th same; shall be perfectly sweet, and in all respects of the best quality; and shall be delivered in good shipping order, free of all charge to the United States, in the best new, well-seasoned, sound, bright barrels, or half-barrels, as the case may be, the staves and headings to be of red oak. of the best quality, strong and well hooped, with hining hoops around each head, and equal in quality to sample barrel at the said Navy Yard quantity to sample barrel at the said Navy 1 and; two half-barrels to be considered as a barrel, and not more than one-sixth of the required quantity to be in half-barrels.

The rice shall be of the very best quality, and

of the crop immediately preceding the dates of the requisitions for the same. The dried apples shall be of the best quality,

and shall be prepared by sun-drying only, and of the crop of the autumn immediately preceding the dates of the requisitions for the same; and shall be delivered in packages containing not more than three hundred pounds.

The pickles shall be put up in iron-bound casks, the iron boops to be 1 inch wide and 1-16 inch thick, and each cask shall contain one galon of onlons, one gallon of peppers, and eight gallons of medium cucumbers, fifty to the gallon, and the vegetables in each shall weigh fiftyseven pounds, and they only be paid for; and each cask shall then be filled with white wine vinegar, of at least 42 degrees of strength, and equal to French vinegar; and the contractors shall warrant and guaranty that they will keep

good and sound for at least two years.

The Iron hoops on the barrels containing whis-ky, molasses, vinegar, and pickles, to be well ainted with red lend.

painted with red lend.

The sugar shall be dry and fit for packing, and equal in quality to the best Havana brown.

The tea shall be of good quality young hyson, and be delivered in half or quarter chests on y.

The beans shall be of the very best quality white beans, and shall be of the crop immediately preceding the dates of the requisitions for the crop of the product of the crop immediately preceding the dates of the requisitions for

ne, 64 pounds to be taken as one bushel olasses shall be fully equal to the ver

best quality of New Orleans molasses, and shall be delivered in new, well-seasoned red oak bar-rels, with white pine heads not less than 14 inch thick; the staves not less than inch thick; the barrels to be three-quarters hooped, and, in addition, to have four fron hoops, one on each blige, 1½ inch in width and 1-16th inch thick, and one on each chime, 1½ inch in width, and and one on each chime, 11 inch in width, and 1-16th inch thick, and shall be thoroughly coopered and placed in the best shipping condi-tion.

The vinegar shall be of the first quality, equal to the standard of the United States Pharmaco-pæia, and shall contain no other than acetic wid: and shall be delivered in barrels similar in all respects to those required for molasses, with the exception that white oak stares and heads shall be substituted for red oak staves and white pine heads, and shall be thoroughly coopered and placed in the best shipping order. The whisky shall be made wholly from grain,

sound and merchantable, and be full first proof, according to the United States custom-house standard, and shall be double rectified. It shall be delivered in good, new, sound, bright, three quarters hooped, well-seasoned white oak barrels, with white oak heads, the heads to be made of three-piece heading, and well painted the staves not to be less than \(\frac{a}{2}\) inch thick, and the heads not less than \(\frac{a}{2}\) inch thick; and each barrel shall be coopered, in addition, with one three-penny iron hoop on each bilge, 14 inch in peony hoop on each chime, 1} inch in width and 1-16th inch thick, as per diagram, the whole to be put in good shipping order, free of all charge to the United States.

All the foregoing described articles, embracing casks, barrels, half-barrels, and boxes, shall be subject to such inspection as the chief of the Bureau of Provisions and Clothing may direct, the inspecting officer to be appointed by the Navy Department All inspections to be at the place of delivery. Biscuit may, however, be inspected at the place of manufacture, but will in all cases be subject to a final inspection at the place of delivery before the bills are signed therefor

The prices of all the foregoing articles to be the same throughout the year, and hidders may offer for one or more articles, and his offer will be accepted for that article for which his proposal may be lowest.

All the casks, barrels and balf-barrels, hoves or packages, shall be marked with their contents and the contractor's name. All the barrels and half-barrels of flour, bread and pickles, shall have, in addition to the above, the year when manufactured or put up marked upon them.

The quantity of these articles which will be required cannot be precisely stated. The con-tracts will therefore be made, not for specific quantities, but for such quantities as the service

may require to be delive.ed.

Contractors not residing at the place where deliveries are required, must establish agencies at such place, that no delay may arise in turnishing what may be required; and when a contractor fails promptly to comply with a requisi-tion, the Chief of the Bureau of Provisions and Clothing shall be authorized to direct purchases to be made to supply the deficiency, under the penalty to be expressed in the contract; the record of a requisition, or a duplicate copy there-of, at the Bureau of Provisions and Clothing, or at the Navy Yards aforesaid, shall be evidence. that such requisition has been made and re-

Separate offers must be made for each article and in case more than one article is contained in the offer, the Chief of the Bureau will have the right to accept one or more of the article ed in such offer, and reject the remainder and bidders whose proposals are accepted, (and none others,) will be forthwith notified, and carry as practicable a contract will be transmitted them for execution, which contract must be re-turned to the bureau within five days, exclusive of the time required for the regular transmission

Two or more approved sureties in a sum equal to the estimated amount of the respective contracts will be required, and twenty per centum in addition will be withheld from the amount of payments on account thereof, as collateral

security, in addition, to secure its performance, and not in any event to be paid until it is in all respects complied with; eighty per centum of the amount of all deliveries made will be paid y the navy agent within thirty days after bills, inly authenticated, shall have been presented

Blank forms of proposals may be obtained on application to the navy agent at Philadelphia. A record, or duplicate of the letter informing

bidder of the acceptance of his proposal, be deemed a no ification thereof, within the meaning of the act of 1846, and his bid will be made and accepted in conformity with this understanding.

Every offer made must be accompanied (as

directed in the act of Congress making appro-priations for the naval service for 1846-47, ap-proved 10th of August, 1846,) by a written guaranty, signed by one or more responsible persons, to the effect that he or they undertake that the bidder or bidders will, if his or their that the bidder or bidders will, it has or their bid be accepted, enter into an obligation within five days, with good and sufficient sureties, to farnish the supplies proposed. The bureau will not be obligated to consider any proposal unless accompanied by the guaranty required by law; the competency of the guaranty to be certified by the navy agent, district attorney, or collector f the customs.

The attention of bidders is called to the samples The attention of bidders is called to the samples and description of articles required, as, in the in-spection for reception, a just but rigid comparison will be made between the articles offered and the sam-ple and contract, receiving none that fall below them; and their attention is also particularly directed to the joint resolution of 27th March, 1854, and to the art of the 10th August, 1846. june 27—law4w

Proposals for Army Baggage Wagons.

QUARTERMASTER GENERAL'S OFFICE, Washington, June 21, 1861.

DROPOSALS are invited for the furnishing of army baggage wagons.
Proposals should state the prices at which they

can be furnished, delivered at New York, Balti-more, or Washington, stating the price, delivered

at each place
The number which can be made by any bidder within one month after receipt of the order, also the number which he can deliver within one

The wagons must exactly conform to the following specifications, and to the established pat-

Six-mule (covered) wagons, of the size and description as follows, to wit:

The front wheels to be three feet ten inches high; hubs ten inches in diameter and fourteen and a quarter inches long; hind wheels four feet ten inches high, hubs ten and a quarter inches in diameter and fourteen and a quarter inches long; fellies two and a half inches wide and two and three-quarter inches deep; cast iron pipe boxes twelve inches long, two and a half inches at the large end and one and seven-eighths inch at small end; tire two and a half inches wide by five-eighths of an inch thick, fastened with one screw bolt and nut in each fellie; hubs made o gum, the spokes and fellies of the best white oak free from defects; each wheel to have a sand band and liuchpin band two and three-quarter inches wide, of No. 8 band iron, and two driving oands-outside band one and a quarter inch by one-quarter inch thick, inside band one inch by sixteenths inch thi k: the hind wheels to se made and boxed so that they will measure from the inside of the tire to the large end of the box, six and a half inches, and front whee six and one eighth inches in a parallel line, an each axle to be three feet eleven and three-eighth nches from the outside of one shoulder-washer to the outside of the other, so as to have the vagons all to track five feet from centre to centre of the wheels. Axietrees to be made of the best quality refined American iron, two and a half inches square at the shoulder, tapering down to one and a balf inch in the middle, with a seveneighths inch king-bolt hole in each axietree; washers and linchpins for each axietree; size of linchplus one inch wide, three-eighths of an inch thick, with a hole in each end; a wooden stock four and three-quarter inches wide and four inches deep, fastened substantially to the axle ree with clips on the ends and with two bolts, six inches from the middle, and fastened to the hound- and bolster, (the bolster to be four feet five inches long, five inches wide, and three and a half inches deep,) with four half-inch bol's.

The tongue to be ten fcessight inches long, four inches wide, and three inches thick at front end of the hounds, and two and a quarter inches wide by two and three-quarter inches deep at wide by two and three-quarter means the the front end, and so arranged as to lift up, the front end of it to hang within two feet ground when the wagon is standing at rest on a

The front hounds to be six feet two inches long, three inches thick, and four inches wide over axletree, and to retain that width to the back end of the tongue; jaws of the hounds one foot eight inches long and three inches square at the front end, with a plate of iron two and a half inches wide by three-eighths of an inch thick, fastened on top of the bounds over the bolt in each end, and a plate of iron of the same size turned up at each end one and a half inches to clamp the front bounds together, and fastened on the under side and at front end of the hounds with half inch screw bolt through each hound a seven-eighth inch bolt through tongue and hounds in the centre of jaws, to secure the tongue in the hounds; a plate of iron three inches wide, one quarter inch thick, and one foot eight inches long, secured on the inside of jaws of bounds with two rivets, and a plate of same dimensions on each side of the tongue, where the tongue and hounds rub together, secured in like manner; a brace of seven-eighths of an inch round iron to extend from under the front axietree and take two bolts in front part of the bounds; same brace three-quarters of an inch round to continue to the back part of the hounds, and to be fastened with two bolts, one near the back end of the hounds and one through the slider and hounds : a brace over front bolst and a half inch wide, one quarter of an inch thick, with a bolt in each end to fasten it to the hounds the opening between the jaws of the hounds to receive the tongue four and three-quarter inches in front, and four and a half inches at the back

part of the jaws.

The hind hounds four feet two inches long, two and three-quarter inches thick, and three inches and three-quarter inches thick, and three inches wide; jaws one foot long where they clasp the coupling pole; the bolater four feet are inches lorg and five inches wide by three inches deep, with steady iron two and a half inches wide by one-half inch thick, turned up two and a balt nehes and fastened on each end with three rivets the bolster stocks and hounds to be secured with four half-inch screw bolts, and one half-inch screw bult through the coupling pole

The coupling pole nine feet eight inches long, hree inches deep, and four and a half inches wide at front end, and two and three-quarter inches vide at back end; distance from the centre of kingbolt hole to the centre of the back axeitree, six feet one inch, and from the centre of king-bole hole to the centre of the mortice in the hind and of the pole, eight feet nine inches; king-bolt one nd a quarter inches diameter, of best refined on, drawn down to seven-eighths of on inch where it passes through the iron axletree; iron plate six inches long, three inches wide, and one-lighth of an inch thick on the doubletree and tongue, where they rub together; from plate one and a half by one-quarter of an inch on the siding bar, fastened at each end by a screw bolt through the hounds; front bolster to have plates above and below, eleven inches long, three and a half inches wide, and three-eighths of an inch thick, corners drawn out and turned down on the sides of the bolster, with a nail in each corner, and four countersunk nails on top; two bands on the hind hounds, two and two and a half inches wide, of No. 10 band iron the rub plate

on the coupling pole to be eight inches long, one and three quarters inches wide, and one-quarter of an inch thick. Doubletree three feet ten inches long, singletree two feet eight inches long, al well made of hickory, with an iron ring and clip at each end, the centre clip to be well secured; lead bar and stretcher to be three feet two inches long, two and a quarter inches wide, and one and a quarter inch thick. Lead bars, stretchers, and singletrees for six mule team; the two sinfor the lead mules to have books in the middle to book to the end of the fifth chain,

wheel and middle pairs with open rings to attach the m to the doubletree and lead har.

The fifth chain to be ten feet long to the fork the fork one foot ten inches long, with the stretcher attached to spread the forks apart; the links of the doubletree, stay and tongue chains, three-eighths of an inch in diameter; the forked chain seven-sixteenth Inch in diameter; the fifth chain to be seven-sixteenth inch diameter to the the fork to be five-sixteenth inch diameter the links of these and of the lock chains to be not more than two and a quarter inches long.

The body to be straight, three feet six inches wide, two feet deep, ten feet long at the bottom and ten feet six inches at the top, sloping equal; at each end all in the clear or inside; the bepieces to be two and a half inches wide, and three inches deep; front pieces two inches deep by two and a half inches wide; tait piece two a balf inches wide and three inches and four inches deep in the middle to rest on the coupling pole; top rail one and a half inch thick by one and seven-eighth inch wide; lower rails one inch thick by one and seven-eighth inch wide; three study and one rail in front, with a seat on strap hinges to close it up as high as the sides; a box three feet four inches long, the bottom five inches wide front side, nine and a half inches deep, and eight and a half inches at the top in parallel line to the body, all in the clear, to be substantially fastened to the front end of body, to have an iron strap passing round each end, secured to the head piece and front rail by a rivet in each end of it passing through them, the lid to be fastened to the front rail with two good strap hinges, a strap of five-eighth inch iron around the box a half inch from the top edge, and two straps same size on the lid near the front edge to prevent the mules from eating the boxes; to have a joint hasp fastened to the middle of the lid, with a good wooden cleat on the inside, a strap of iron on the centre of the box with a staple passing through it, to fasten the lid to; eight stude and two rails on each side; one bolster fastened to the body six inches deep and four inches wide at king-bolt hole; fron rod in front and centre, of eleven-sizteenths of an inch round iron, with a head on the top of rail, and nut on lower end; iron rod and brace be-bind, with shoulders on top of tail piece, and nuts on the under side, and a nut on top of rail; a plate two and a halt inches wide of No. 10 band iron, on tail piece, across the body; two mortices in tail piece and hind bar, two and a quarter inches wide and one inch thick, to receive pieces three feet four inches long, to be used as harness bearers; four rivets through each side stud and two rivets through each front stud, to secure the lining boards, to be of the best quality fron and riveted on a good bur; one rivet through each end of the rails, floor five-eighths of an inch oak boards; sides tive-eighths of an inch white pine, tail-board three quarters of an Inch thick, of white pine, to be well cleated with five oak cleate riveted at each end through the tail board; an iron plate three feet eight inches long, two and a quarter inches wide, and three-eighths of an inch thick on the under side of the bed piece, to extend from the hind end of the body to eigh inches in front of the hind bolsters, to be fastened by the rod at the end of the body, by the lateral rod and two three-eighths of an inch serew bolts, one at the forward end of the plate and the other about equidistant between it and the lateral rod A half-inch round iron rod or bolt to pass disgonally through the rails between the two hind gonaly through the rais between the two hind studs to and through the bed piece and plate under it, with a good head on the top and nut and screw at the bottom, to be at the top one foot six inches from inside of tuil board, and on the bottom ten inches from the hind rod. An iron clamp two inches wide, one-quarter of an inch thick around the bed piece, the centre bolt to which the lock chain is attached passing through it, to extend seven inches on the inside of the body, the ends, top, and bottom to be se-cured by two three-eighths inch screw bolts, the piece on the lower side. Two lock chains se-cured to the centre bolt of the body, one end eleven inches, the other two feet six inches long, to be of three-eighths of an inch round from feed trough to be four feet six inches long from out to out, the bottom and ends of oak, the sides of yellow pine, to be eight inches wide at bottom twelve inches wide at top, and eight and a half inches deep, all in the clear, well ironed, with a band of hoop iron around the top, one around each end and three between the end, strong and suitable irons to fasten them on the tongue when feeding; good strong chains to be attached to the top rail of the body, secured by a staple with s hook to attach it to the trough. Six bows of good ash, two inches wide and one-half inch k, with three staples to confine the ridge pole to its place; two staples on the body, to secure each end of the bows; one ridge pole twelve feet long, one and three-quarters inch wide by five-eighths of an inch thick: the cover to be of the first quality cotton duck, No. —, tifteen feet long and nine feet eight inches wide, made in the best manner, with four hemp cords on each side, and one through each end to close it at both ends; two rings on each end of the body, to close and secure the ends of the cover a stable in the lower rail, near the second stud from each end, to fasten the side cords. The outside of the body and feed trough to have two good coats of white lead, colored to a blue tint. the inside of them to have two coats of renitian red paint; the running gear and wheels to have wo good coats of venitian red, darkened to late color, the hub and fellies to be well pitched, instead of painted, if required.

A tar pot, an extra king bolt, and two extra singletrees to be furnished with each wagon, the king bolt and singletrees similar in all respects

those belonging to it. Each side of the body of the wagon to be marked U. S., and numbered as directed; all other parts to be lettered U. S.; the cover, feed box, boits, linchpins, tar-pot, and harness bear-ers for each wagon to be put up in a strong box, (coopered,) and the contents marked thereon. It is to be distinctly understood that the wag-

ons are to be so constructed that the severe parts of any one wagon will agree and exactly fit those of any other, so as to require no numbering or arranging for putting together, and all the materials used for their construction to be of the best quality; all the wood theroughly seasoned, and the work in all its parts faithfully executed in the best workmanlike manner.

The work may be inspected, from time to time, as it progresses, by an officer or agent of the Quartermaster's Department, and none of it shall be painted until It shall have been inspected and approved by said officer or agent authorizedto inspect it. When finished, painted, and accepted by an officer or agent of the Quartermaster's Department, and delivered as herein agreed, they shall be paid for-

CONGRESS HALL.

SARATOGA SPRINGS. HIS well-known hotel, which has received so generous a patronage from the public, is now open for the season.

The ample grounds of the hotel adjoin those of Congress Spring.

A fine band of music is attached to the botel.

The table will be supplied, as formerly, with

all the luxuries of the season.

The proprietors will spare no effort to main-tain and augment the high character which Congress Hall has maintained for so many years.
HATHORNE & McMICHAEL.

OFFICE OF SECRETARY AND TREASURER

Near the city of Washington.

SEALED PROPOSALS will be received at this
office uptil Manday (2014) SOLDIERS' HOME. O office until Monday, (noon,) the 29th of July, 1861, for the construction of two buildings at the

Soldiers' Home, somewhat similar to the two now there known as officers' quarters. The plans and specifications may be examined at this office, where all information relative to the location and character of the buildings will

be given. Every offer for the construction of these buildings must be accompanied by a responsible writ-ten guaranty that, if the bid should be accepted the party or parties will, within ten days, enter into an obligation, with good and sufficient security, to erect the proposed buildings according to the plans and specifications which have been or may hereafter be furnished and adopted.

The proposals will state the difference between facing the walls with white stone or marble, similar to the buildings already erected, or facings with the best pressed bricks; or bidders may, in addition, make such proposals as to other mate-

rials as their experience may suggest.

In deciding on the bids, regard will be had to the materials offered, and the right will be reserved by the Board of Commissioners of the Soldiers' Home to accept such offers only as may be deemed most advantageous for the institu-tion; and also to reject the whole should none of them be deemed acceptable.

All bids to be scaled and endorsed "Proposals

for Building," and addressed to BENJAMIN KING.

Ass't Surgeon, Secretary and Treasurer july 3-dtd

FOR THE CURE OF

DYSPEPSIA, INDIGESTION, Weakness or Debility, Flatulency and Wauses Loss of Appetite, Nervousness, Liver Com-plaints, Bilious Fevers, and all Diseases of the Stomach, Liver, and Bowels. AS A PREVENTIVE FOR FEVER AND AGUE.

W. P. & A. W. GREELEY, Proprietors, Boston

THESE BITTERS ARE NOT EQUALLED.

THE OBJECT of all medicine is either to pre rent disease, or to assist Nature in restoring the various organs of the body to a healthful action and that medicine is certainly the best which will perform those offices thoroughly, yet mildiy, and without endangering the vital forces of the system, by whose normal condition alone health and strength can be preserved. Most of the Bitters that have heretofore been brought into popular favor, have only served the purpose of tomperarily stimulating or exciting the organs into condition resembling healthful action, without any remedial effect, and generally followed by a return of the disease, or a prostration of nervous energy more disastrons than though Nature had

been left to take its own course. Dr. Greeley's Bitters are a preparation of the untritive proporties of the grain of the fields is combination with the active principle of many simple alteratives and bitter tonics, and it is pleasure to the proprietors to state that its usefulness is being generally acknowledged by the largely-increasing consumption in those sections where it is best knows, and by the testimony of many eminent physicians, who have not only made trial of it, but continually prescribe the Bitters in those cases for which it is recommended.

AGED PROPIE, AND ALL WEAKLY PER SONS,

Consumptive patients, and others, whose constitutions have become impaired by time, or enfeebled by disease, and in whom the process of digestion does not replace the fat and tissued of the body as fast as they waste, will find these Bitters at once nourishing and strengthening, and happily adapted for their use. The great advantage the Bitters possess over ordinary stimulants usually prescribed in treating lung complaints and kindred diseases, is the fact that they combine many safe and certain beeling properties in connection with the best known atimulant.

DELICATE LADIES

Will derive great benefit from it. No unpleasant effect will ever result from taking the Bittore, if the directions are followed. For those who suffer from nervous debility, languor, want of rest, exhaustion, and in all cases of weakness, the Bliters are not equalled.

As an agreeable stomachie, it is much admired; it sharpens the appende, brightens the intellect, and infuses now lite and vigor. No one who uses these Bitters and be subject to an attack of FEVER and AGUE, or DIARRHOLA.

Of all the ills that afflict men and women, few are so agenizing as Dyspensia. It is a sort of combination of many diseases. Thanks to science and Ds. Gerkiky, a specific has now been obtained. Grentey's Bounnan Birrans take straight hold of the disease, and begin a cure. sands of well-attented cases of cures of Dyspepsia, Indigestion, and Fever and Ague, ever he most desperate kind, are in the

the most depreted the proprietors.

Not a few people, everywhere, complain of Weakness or Debility. This is the gentle hint of nature for a little help in the way of invigoration of nature hint should not be neglected. "A tion. The hint should not be neglected. "A stitch in time saves nine." Get a supply of Gama-LEC'S BOURDON BITTENS, take them regularly, and our word for it you will feel better, live longer, be stronger, and think and act with very much more satisfaction. The Bitters are a tonic, and of nature never before attained in any medicine. It will make the weak strong, the desponding hopeful, the sick well. For any complaint of the Stomach, Liver, or Bowels, there is nothing comparable with this medicine.

In America, the Liver is the best abused of all the organs in the body. It is made the endule of all other organs. As a consequence, it is often out of order, and not unfrequently nearly inoperative. This need not be; on the contrary, it is quite unnecessary. A little common sense, and a sufficiency of Greeney's Bourson Britans, will keep the Liver right, and make man a man, and wo-man, now miserable, quite happy. The Bitters regulate and strengthen the Liver, no less than purify it.

The increase of Nervous Disorders, at the present day, is one of the most alarming indications of the age, or rather, would be, were it not that a most admirable cure had been found. There is not a phase of Nervous disease, whatever it that these Bitters will not act upon favorably, and in the most efficient manner. All of this nature, or with Indigestion, or any dis-cases of the Stomach, should not fail to make use of GREELEY'S BOURDON BITTERS.

Chills and Fever. In many portions of the United States this terrible disease seizes its victims as naturally as water seeks its level. The system in a particular cerdition invites it. The right medicine to prevent and cure this malady, we unhealtatingly say, is Garmany, Bourman Bryrans. It breaks up the fover, drives it from the system, and will keep it at bay, if taken in accordance with directions on the bottle. The Bitters purify and carich the blood, and this in return strengthens the constitution. As an agree

able tonic, these Bitters have no equal.

Greeley's Bourbon Bitters are meeting a sais upparalleled in the history of popular medicines In all diseases of the Stomach and Bowels they are a covereign cute. The worst cases of Dyn-pepsia and indigestion yield to the remarkable potency of the Bitters, which is an agreeable to the taste as it is speedy and unfailing in its good

effects.

For sale by Druggists and Grocers, everywhere.
